

Webmaster

I have built and maintained many websites over the years. I build them from the ground up. Code & graphics included. These days I really have come to like WordPress, & other pieces of software that helps make management of content easier. Besides websites, I'm a computer consultant, systems admin, and I've even been a database manager. I have researched for pay. If it takes a monitor & keyboard I've probably worked with it, & know it, intimately! ;) I have a college degree and over 20 years experience. Money talks, so talk to me! :) More coming soon!
